

The **Utterly Yours™ Breast Pillow** was specially designed by a mom to make nursing a much simpler and hands-free process. The pillow provides the most comfortable breast support and optimal breast position for nursing.

The product is targeted towards larger breasted women and those dealing with the forces of gravity which makes nursing a more challenging endeavor. These women constantly have to adjust or hold their breast which can make nursing a tiresome and frustrating activity.

The **Utterly Yours™ Breast Pillow** eliminates this very common issue so that moms can relax and focus on their baby while nursing, or just free their hands to enjoy another activity such as reading a magazine. While other products help make nursing more comfortable by supporting the baby, no product has yet addressed the need for breast support which is a need that continues to exist even when using other such products.

How to Use: The Utterly Yours™ Breast Pillow is very simple to use. Simply hold the pillow in the palm of your hand; compress with your thumb and fingers; position it at the curved underside at the base of your breast and release. The pillow will return to its original shape... lifting and supporting your breast for a more comfortable and hands-free nursing experience.

FAQs:

1. Can I wash the pillow?

Each pillow comes with a removable slip cover that is machine washable. Additional covers are sold separately for those who would like an extra cover while the other is in the wash. The pillow itself is made of a high density memory foam and should not be put in the washing machine. Light surface cleaning is acceptable if necessary.

2. Can I use this while wearing a nursing bra?

Yes. The pillow works exactly the same way as when used without a bra. Just compress the pillow and place it under your breast. It will lay over the bra strap that may also be under your breast.

3. Can the pillow be used with baby supporting products like "My Brest Friend" and the "Bobby?"

Yes. The Utterly Yours™ Breast Pillow is complimentary to these types of products. While these products support the baby during nursing, the Utterly Yours™ pillow provides support for the breast so that moms are free of having to hold and support their breast themselves.

4. Is the pillow disposable?

No. The Utterly Yours™ Breast Pillow is made of high density memory foam and the cover is made of machine washable fabric. However, Utterly Yours™ has introduced a hospital grade version of the pillow that with disposable covers for nurses and lactation consultants who would like to introduce the product to new moms during their stay in the hospital post partum.

5. Can I use the pillow when I'm nursing while lying down?

The pillow was designed to be used while in a sitting position, however, we have heard from moms that this has been extremely helpful even when they nurse while lying down. It may help give the breast an extra lift to provide a better angle for your baby to feed.
